Introduction

Contact information

Name: William Norland
Languages: Swedish (Native), English (Fluent)
Current Location: Gothenburg, Sweden
Phone: +46 72 337 89 60
Mail: williamnorland@gmail.com
LinkedIn: linkedin.com/in/william-norland
GitHub: github.com **Areas of interest:** Data Science, Data Engineering, Machine learning, Agentic AI, Software Engineering
Technical Skills: Python (NumPy, Pandas, PyTorch, TensorFlow, FastAPI, Flask, SQLAlchemy, Pydantic, Matplotlib, Gymnasium, Scikit-learn), Java (Spring, LangChain4j), C/C++ (CMake), Haskell, SQL (PostgreSQL), JavaScript/TypeScript (React, Next.js), Linux, Git, Docker

Experience

WEON - Machine Learning Engineer

Jan 2025 – Present | Working as a part-time Machine Learning Engineer in combination with my studies at Chalmers University of Technology. My main task was designing, implementing, and maintaining the size recommendation algorithms. But throughout my time as an intern engineer I got to work across many other technical aspects of WEON including, 3D measurement systems, data collection & data processing, configuring generative image models, frontend web design for internal tools, backend size recommendation logic and databases, and API servers.

Chalmers University of Technology – Teaching Assistant

Oct 2024 – March 2025 | Teaching Assistant for two courses (TDA553 and TDA367) on Object-Oriented Programming (OOP) in Java; one teaching the basics of Object-Oriented Programming (OOP), and the other course where students had to apply their learned OOP skills in groups to develop a Java project over the span of half a semester.

Skandinaviska Enskilda Banken (SEB) – Client Services Manager

May 2023 – Aug 2023 | Worked at SEB trade finance with document handling during the summer of 2023. Parallel to this, I developed an application to help with turning paper documents into database entries using the Tesseract OCR (Optical Character Recognition) engine.

Swedish Armed Forces (Försvarsmakten) – Soldier

Jul 2020 – Jul 2022 | Completed my 11-month mandatory national service in 2021, and continued to work for one additional year as a professional soldier in the Swedish Armed Forces.

Education

Chalmers University of Technology – M.Sc. in Data Science & AI

2025 – 2027 | A curriculum centered on understanding, designing, building, and applying many different AI models for classification, regression, and generative tasks. The curriculum emphasized the application of mathematical frameworks like probability, Bayesian statistics, optimization, and linear algebra to solve real-world Data Science, and AI, problems.

University of Tokyo – GSFS – LISD Lab – Special Auditing Student

2026 – 2026 | Spent a semester as a special auditing student at the LISD Lab within the Graduate School of Frontier Sciences, University of Tokyo. Researched, and wrote a paper about, how agentic AI can be used in agent-based simulations and took related courses.

Chalmers University of Technology – B.Sc. in Software Engineering

2022 – 2025 | A curriculum centered on the principles of software architecture and engineering, supplemented by a solid foundation in mathematics. The curriculum emphasized the use of software design patterns, software paradigms, and agile methodologies to solve problems in the Software/IT domain. Bachelors thesis "Introducing the ModularML Framework" consisted of building an AI Model Inference Engine from scratch which could successfully run ONNX format image models, for example LeNet and AlexNet. Our inference engine was successful in reproducing model accuracy results from contemporary frameworks.

Other Merits

- Trained on operating passive sonar systems (Swedish Navy).
- Athletic background as a Competition Swimmer.
